Tools	Git, GitHub, GitLab, Anaconda, PyCharm, Android Studio, VS Code
Design	Figma, Adobe XD, Photoshop, Canva, Microsoft Office Suite
Operating Systems	Windows, Ubuntu, Fedora

Professional Experience

Software Developer

Jul 2024 – Present

National Informatics Centre (NIC), West Bengal

Kolkata, India

- Developed and maintained e-Governance software solutions serving thousands of citizens for government services.
- Designed and optimized large-scale relational databases (PostgreSQL, MySQL) for efficient data management and retrieval.
- Implemented secure authentication systems and data privacy techniques compliant with government security standards.
- Collaborated with cross-functional teams including business analysts and domain experts to deliver scalable web solutions.
- Handled end-to-end testing, debugging, and performance optimization to ensure system reliability.

Front-End Web Development Intern

Jun 2023 – Jul 2023

IBM SkillsBuild and CSRBOX

Remote

- Completed an academic internship focused on modern front-end web development practices and frameworks.
- Delivered a full-stack web project demonstrating proficiency in HTML, CSS, JavaScript, and responsive design.

Projects

Jai Bangla | PHP, Laravel, PostgreSQL

- Full-stack web application for beneficiary registration, verification, and payment management under a state government scheme.
- Built dynamic dashboards with role-based access control and audit logging for administrative oversight.

Lakshmir Bhandar | PHP, Laravel, PostgreSQL

- Developed a government welfare portal for managing beneficiary records and disbursement of financial assistance.
- Implemented batch-processing workflows and PDF report generation for state-level data analytics.

West Bengal Tourism Portal | PHP, Laravel, MongoDB

- Built a full-stack tourism information portal featuring destination listings, dynamic content management, and responsive UI.

BloodMates | *React Native, Firebase, AI Chatbot*

 GitHub

- Cross-platform mobile app connecting blood donors with recipients using real-time Firebase database and geolocation.
- Integrated an AI chatbot to guide users through the donation process and eligibility checks.

DAAV Invoice Management | *PHP, MySQL, JavaScript*

 GitHub

- Full-stack web application for inventory tracking, invoice generation, and factory workflow management.

Food Billing System | *Python, Tkinter, Pandas, Matplotlib*

 GitHub

- Desktop GUI application for restaurant billing with data export, visual sales analytics, and receipt generation.

Certifications

Machine Learning Specialization – Duke University & University of Michigan (Coursera)

Front-End Web Development – IBM SkillsBuild (2023)

Tech-Wizard Program – MyCaptain Academic Internship

Leadership and Achievements

Lecturer (3 Years) – Delivered computer science instruction at Jatya Yuva Computer Siksha Mission, covering programming fundamentals and software tools for youth learners.

Student Academic Mentor – Guided junior students in the Department of Computer Science, supporting coursework and project development.

General Secretary – Elected head of the College Student Community, organizing technical events, workshops, and inter-departmental activities.
